

Launch of Optimet New Website

May 2010, Optical Metrology Ltd. (Optimet), provider of non contact 3-D measurement solutions, announces the launch of its new website, www.optimet.com, featuring expanded information on products and application diversity in a fresh design and friendly interactive platform. The new website, launched this morning, is designed for QC engineers, metrology experts and other users, to easily find information and the relevant product and accessories required for their application.

The site includes extensive product data and specifications, a wide range of modular accessories, information on applications, technological innovations, articles and case studies, background on Optimet and solutions in the Dental CAD/CAM fast growing market.

Optimet CEO, Yitzhak Daniel stated; "We are pleased to launch an updated and fresh website including latest innovations and capabilities in the Industrial and Dental CAD/CAM fields. Our partners and users can experience a more vibrant and seamless view of the whole product line serving as the first point of contact".

About Optimet: *Optimet (Optical Metrology Ltd.), is a provider of sophisticated non-contact measurement sensors and solutions, with up to sub-micron precision, for Distance, 2-D & 3-D measurements. Optimet is a member of the Ophir Optronics group, a world leader in Laser Measurement Instruments and Optical Infra-Red lens-assemblies. Optimet 3D products and solutions are used for in-process inspection, quality control and reverse engineering in Automotive, Aerospace, Dental CAD/CAM, Steel, LCD in-process inspection industries and more.*
